Mines and Mining Stocks

STRIKE IS MADE N THE FAIRVIEW

Dispatch from Camp Says Ore Running \$244.50 to \$550 a Ton Is Encountered.

ALL SAME AS NEVADA HILLS

MINE WORKINGS LOOK GOOD ALL THROUGH.

According to a message from Superin- Following is the list of final quotations tendent A. H. Williams, of the Nevada and record of sales made during the day: According to a message from Superin-Fairview company's properties, in the Fairview district, Nevada, a strike has been made that is to be compared onl with similar disclosures made in the Ne vada Hills at different times since th opening of that property began.

On Tuesday two samples were taken o the face of the drift being run from point fifty feet down in the shaft that has been sunk 100 feet at the mouth of what is known as No. 2 tunnel. One sample assayed \$244.50 per ton and the second

ple assayed \$244.50 per ton and the second one went \$550.

A letter received a day or two before this strike was made stated that the property was looking better every day and Mr. Williams expressed the opinion then that there was no other property in that section of Nevada that he would trade the Fairview for, excepting the Nevada Hills. A great deal of work has been done in the Fairview property and the development has been of a character calculated to demonstrate and locate the ore shoots along the great ledge that traverses the ground. That results are now beginning to be realized is plainly shown in the description of what is shown in in the description of what is shown in the various workings and the officials of the company are-now in high spirits ove the outlook for the future.

DEVELOPMENTS AT MIZPAI

Late Reports from District Show Good Results of Operations.

Ely, Nev., July 18.—Excellent reports were brought in by arrivals last night from the Mizpah district. The camp is very lively and scores of prospectors are swarming the country. Considerable worl is being done and Mizpah promises to be one of the liveliest districts in the section.

Mr. Christ, formerly of Salt Lake, state that some fine strikes have been mad on the Mizpah Consolidated company on the Mizpah Consolidated company's property. The shaft in the Nevada Northern claim of this company's property is down sixty-five feet and the vein is over three feet wide. It started at the surface with a width of eight inches and increased gradually as the shaft was sunk. It is wider than the shaft and is very rich. The last assay showed 24.8 per cent copper from the picked rock. The general run of the vein is 14.80 per cent with \$3.96 in silver and a trace of gold. The Cobre claim of this group is also showing up well and the surface rock also showing up well and the surface rock per cent in copper. A tunnel is being run in the Cobre claim with the intention of striking the vein at a depth of 200 100 at 64c.

feet. It is expected that the ore will be Uncle Sam, 800 at 78c It is expected that the ore will be richer at this depth.

sacks were sent there recently. The ore will be sacked and shipped to Salt Lake. There is a large amount of rock on the dumps now and in a short time the company will commence shipping the ore to the smelters. Two shifts are being worked and if the property continues to show up as it is a much larger force of men wil be put to work and mining will be carried on on a greater scale. J. F. Crow, formerly of Ely, and who

has twelve claims in Murray creek, is su perintending the work at the Mizpah Con solidated property. He pronounced the ore as fine as any he has seen in this

A. D. Meyers of Goldfield has a group of claims adjoining the Nevada Northern property. He has a shaft seventy-five feet in depth and the vein is showing up fine. The Meyers property is known as the Tenderfoot group and some big de-velopment work is being done. The district has been pretty well prospected, but there are still quite a number of miners who are scouring the country. The own-ers of other claims in that vicinity are now engaged in doing their assessment

Alpert arrived from the Mizpah dis trict last night and corroborates Mr. Christ's reports. He states that a stock eompany is developing the Canadian group and that it is reported a mill will be put up on the Fisher property. Al-pert and A. C. Cordiner of Ely are work-ing the Success group of mines and are now doing their assessment work.
"A spur track is being laid toward the Mizpah side," said Alpert. "The rails and ties are at hand and the track will soon be ready for the ore trains. In a very short time a great amount of ore will be shipped out over the Nevada Northern to the Salt Lake smelters."

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Emma Copper moved up to 20c a share vesterday and those who loaded up at 40c to 80c a share are hoping that the rise will be continuous and that they will yet have a change to break even. A sale of Ohto Copper was reported in the morning at \$5.60, but as \$5.90 was bid for it a short time before and as the stock sold at \$5.90 in the afternoon, the first transaction was viewed as a good deal of a joke around the rail. Newhouse sold at \$16 and East Crown Point at 6c, while Federal-Ely brought 71c.
Bingham Standard Copper was quoted

at 55@56c, McDonaly-Ely at 80@90c, Copper Glance at 16@17c. East Tintic was an offering at 17c, Biscuit at 30c and Ely Witch at 88c, while \$3.70 was bid for Ohio M. S. Hanauer.

MINING STOCK EXCHANGE. PODDE

Heavy offerings of Beck Tunnel and Sioux Consolidated caused those stocks to decline yesterday, though the friends of each refused to permit anything like a stampede. Beck Tunnel was started at \$2.20 and it sold down to \$2.05 before the descent was checked. It closed at \$2.07½. Sioux Consolidated was treated with even less consideration, due, probably, to the fact that a tremendous amount of the stock has been absorbed during the past ten days. Over 20,000 shares of it came out yesterday and the price was reduced from 75c to 63c. No such amounts of stocks could come from anywhere but the inside, and the impression is that there has been a whole lot of realizing by the promoters of the company. The rest of the market held up well considering the performances of these two favorites.

During the two regular and open board calls a total of 76,791 shares of stock, with a selling value of \$90,665.32, changed hands. Following is the list of final quotations and record of seles made during the day:

Influences Governing the Mar-

ket Explained in a Message from Boston.

ON PRODUCTION

LIST OF THOSE WHO USE UP THE RED METAL.

Boston connections of James A. Pollock & Co. yesterday took particular pains to get at the real conditions in the copper metal market and send the result of the investigation over the local brokerage company's private wire for the benefit of those here who are interested in the copper share market. The report makes it apparent that the copper metal market can hardly fail to hold strong, though the smail producers of the metal have a chance to cut prices and further disturb the market if they should become so in-clined. There is lots of real information in the report sent out, which reads

Influences Governing Market.

While there has been no large sales of copper since the price was reduced to 23 and 22 cents for Calumet, lake and electrolytic respectively, we understand that the United Metals Selling company, during the past two weeks, has sold between 15,000,000 and 20,000,000 pounds in small lots to such consumers as are taking their supplies on a hand to mouth basis. The Calumet & Hecla company, which produces and sells less than one-sixth of the amount annually sold by the United Metals Selling company, has probably disposed of not over 5,000,000 pounds at home and abroad. The Copper Range company recently sold 2,000,000 pounds at 22 cents, which represents its apportloned allotment of the sales of the United Metals Selling company. While there has been no large sales of

The Metals Selling company has notified buyers that they need not expect any further reduction in price, or at least this company would not take the initiative. Of course if the Quincy company, for instance, which is an important trade factor, should find itself in need of cash it might decide to reduce its price to 21 cents, in which event the other large sellers would be compelled to meet the

Small Producers Cut Ice.

During the next three or four months the smaller producers will be a very important factor in the metal market, for they have it in their power by price cutting and further sales to disturb a situation already nervous and unsettled. situation already nervous and unsettled. Charles F. Brocker has not yet bought beyond his immediate requirements, and says he will not do so until the situation looks more clear. The United Metals Selling company is disposed to view the present price reduction as wholly unnecessary and a step which had needless May thrown the industry into confusion. ly thrown the industry into confusion. An interest affiliated with that company

tempt to forecast the immediate future of the copper metal market. All that can be said is that the production of copper in the country at present, is below Great Bend Ext.

MALCOLM MACDONALD LIKES THE ROSEBUD CAMP

Malcolm Macdonald, one of the best known and most successful mining men of the state, spent several days in camp this week, says the Rosebud Mining News. Mr. Macdonald and Lewis A. Parkhurst purchased the Brown Palace from Phil Blume. and it was this deal that first brought Rosebud to the attention of the butside mining world. It is several months since Mr. Macdonald was last in the camp. After making a thorough examination of the Brown Palace and visiting a number of other properties.

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, July 19 After making a thorough examination of the Brown Palace and visiting a number of other properties, including the Big Six, Mr. Macdonald had nothing but words of praise for the camp. He stated that the showings here were the most wonderful he had ever seen, and he is interested in nearly every camp in the state from Tonopah to Greenwater. Both Mr. Macdonald and Mr. Parkhurst will return to town during the present month.

Boston, July 18.—Recent events have led us to radically change our position in the market. We still do not expect any continued upturn, but think the time is ripe for a two or three point rally. Short selling has been noticeable the past two days and the buying has been good. Altogether news is much more bullish on copper and the stocks are surely cheap.

The claims are the Calla H., Susan D., Jennie K. and Wedge Fraction, which are owned outright by the company. The company is capitalized for the regulation 1,000,000 shares, par \$5. with 300,000 shares in the treasury. Van D. Spalding, the big Goldfield operator, is named as president; W. J. Craig, vice president; W. H. Adams, the banker, treasurer. The other directors are E. H. Airis, Brigham T. Cannon and Jacob Evans, the latter of Provo. R. W. Gnekow has been named secretary of the company.

secretary of the company.

It is the intention of the new company to begin operations on the property just as soon as men, materials and supplies can be landed on the ground. A shaft will be put down on the same vein that has proven so rich in the Buckhorn and, with the workings of the latter only about 500 feet away, it is considered a cinch that the same character of ore will be encountered at corresponding depth. The formation is the same and the work so far done shows precisely the same condi-

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$71,000, as follows: Silver, lead, gold and copper ores, \$50,000; base bullion, \$21,000.

Mining Notes.

Eight carloads of ore from Utah and three from Nevada were released from the Pioneer sampler yesterday. Manager Tony Jacobson of the Columbus Consolidated, who has been at camp since Monday, is expected back today. There was released from the Taylor & Brunton sampler yesterday ten carloads of ore from Utah, seven from Nevada and

wo from Idaho mines. Men who are familiar with conditions at the Beck Tunnel company's property aver that mine conditions are better today than they have ever been and they do not exthe management to pass the dividend, as some seem to think will be the case, owing to the extra large amount of development work that is be-
